

1:1 Mentoring Service

Are you looking to scale and up level your interior design business? Or are you ready to get started building your empire and unsure of where to begin? Then the Eliza Grace Interiors 1:1 mentoring is just for you!

After starting my interior design business back in 2013, it took me many years to work out the best systems, processes and ways to attract my dream client that would allow me to turn my side hustle into a full-time business. I want to help you fast track this business journey through sharing my experience and learnings in a simple and easy way.

Are you ready to up level?

Through 1:1 mentoring I can help you fine tune your service offerings and get clear on what you want to provide to your clients. We can create a clear vision on who your dream client is, and I can provide actionable and practical tips on ways to attract them. We will also do a deep dive into your current business, website, social media and processes to build a bespoke strategy and action plan moving forward that is tailored to you. We can chat all things business building, finances, backing yourself, creating your unique aesthetic, putting yourself out there and more!
